

Features

- High efficiency Class-D 2 channel amplifier module
- Compact 2 unit 19" rack-mountable chassis
- Modular construction for ease of service, all modules can be removed for service via the front panel and the chassis can be left connected in the rack
- Clear GLD display indicating:
 - Presence of speakers
 - Overloaded outputs
 - Temperature of power supply and amplifier
 - VC meter output
 - Fan speed
- Front panel led's around rotary encoder wheel give a quick visual indication of signal and clipping
- User defined colour on front panel led's
- Simple front panel rotary encoder/push button control is all that is needed to navigate menus
- Built in 32-bit Analog Devices SignalSP configured by Bluetooth connection
- Inrush current limiter
- Short-circuit, overload, and temperature protection
- Fans with variable speed for quiet performance
- Removable fan grille to allow filter cleaning
- Balanced XLR inputs, Neutrik Speakon outputs
- Neutrik PowerCon power cable included

Load impedance	Output power (RMS with both channels loaded)
Power RMS 8 Ω	2 x 850W
Power RMS 4 Ω	2 x 1400W
Power RMS 2 Ω	2 x 2630W
